

Observability & Data Monitoring

with Syone

Syone provides advanced Observability and Data Monitoring services designed to offer full visibility into your IT systems, ensuring optimal performance and quick detection of issues.

Observability & Data Monitoring Services

By monitoring your infrastructure in real-time, Syone ensures that potential issues are identified and addressed before they impact your operations. This helps you prevent downtime, reduce risk, and maintain high availability across your business-critical systems.

Main Services

Log Monitoring

Gain full visibility into system health, improve troubleshooting, and enhance compliance and security.

Application Performance Monitoring

Monitor cloud-native and distributed applications to quickly identify and resolve issues.

Infrastructure Monitoring

Streamline the collection and management of performance data across all infrastructure components.

Real User Monitoring (RUM)

Track real-world user interactions and performance metrics for enhanced user experience.

Synthetic Monitoring

Simulate user journeys to proactively monitor service availability and functionality.

KPI Dashboards and Reporting

Generate reports that provide a clear overview of key performance metrics for better decision-making.
